

Unmiter

Removes the corner segment of a mitered cline, line, shape or void.

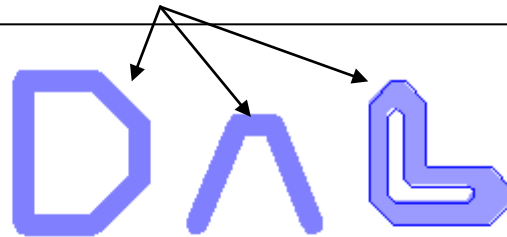

Features:

- ☐ Fast and easy single click operation.
- ☐ Works with all types of segments and shape types.
- ☐ Use “dal chamfer” to add a 45 degree corner.
- ☐ Use “dal radius” to add and arc corner.
- ☐ Dynamic chamfer/radius sizer coming soon.

The single selection point should be on a segment close to the existing corner.
