

## Radius

Adds a chamfer between two clines, lines, shape or void segments.

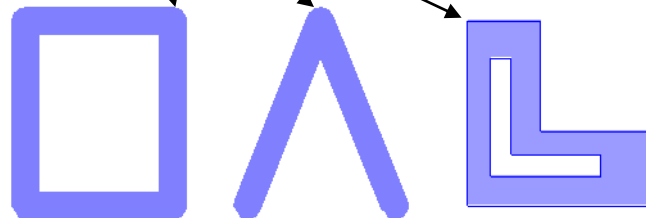

Features:

- ☐ Fast and easy single click operation.
- ☐ Works with all types of segments and shape types.
- ☐ Use “dal chamfer” to add a 45 degree corner.
- ☐ Use “dal unmiter” to remove the chamfer.
- ☐ Dynamic radius sizer coming soon.

The single selection point should be on a segment close to the existing corner.
